27. Description of Accident (include equipment involved, the exact location in the mine, and status of rescue and recovery operations):

On Thursday, January 16, 2014, at approximately 9:00 PM, a general inside laborer was fatally injured. The victim was standing between the coal rib and the feeder on the F-Main Section. The securing post (jill-poke) became dislodged and allowed the feeder to shift and pin the victim between the rib and the frame of the feeder. The victim had just finished connecting a chain between the feeder and the tail piece when the accident occurred.

The information provided in this notice is based on preliminary data ONLY and does not represent final determinations regarding the nature of the incident or conclusions regarding the cause of the accident.
